

HOW TO BUY BABY SHARK TANK

1 DOWNLOAD TRUST WALLET

Write down your seed/recovery phrase, do NOT lose this (Do not screenshot it). Make sure you set up all security measures through settings.

2 BUY SMART CHAIN

Baby Shark Tank is a smart contract on the Binance Smart Chain and can be bought using Smart Chain.

+ Press on your Smart Chain, press 'buy' in the top right hand corner. This will take you to purchase through Simplex, a third party payment provider.

3 FIND PANCAKESWAP IN DEFI

If you're on an Android, go to "Dapps" at the bottom. Find Pancakeswap (decentralized exchange) in DeFi.

If you're an iPhone user you need to enable browser options. Pull up Safari, and put this in your address bar and press enter: Trust://browser_enable

Go back to your Trust Wallet, go to browser at the bottom, scroll to DeFi and open Pancakeswap.

4 CONNECT YOUR WALLET

Connect your Trust Wallet from the top right hand corner where it says "connect". If you're getting an error, you need to swap to Smart Chain (look for the black diamond logo which represents the Ethereum network, press it and swap to Smart Chain).

5 IN THE "FROM" FIELD, SELECT BNB

6 ADD TOKEN ADDRESS

In the "to" field, click select a currency and paste BashTanks token contract address (press add):

0x484312a0aaeae3ae36a74ff3e294246f35dddf4f

7 INPUT BNB NUMBER

Manually input the number of BNB you want to use for this transaction in the "from" section.

8 ADJUST THE SLIPPAGE

Before swapping, click on the gear icon. You will need to adjust the slippage. Set your slippage to 1% and change the last digit of your BashTank to a '1'.

For example, if you're buying 900,000,000 BashTanks, you would manually change it to 900,000,001.

9 "SWAP"

Click "swap". Go through with the transaction.

10 LOG OUT

Once the transaction is complete, scroll back up and click on your wallet address in the top right hand corner (not the profile symbol), and press log out. Do not forget to log out every time!

11 ADD CUSTOM TOKEN, SWAP NETWORK

Go back to your Trust Wallet, click the symbol in the top right hand corner. Add custom token, swap network to Smart Chain. Paste BashTanks token contract address in here. Save it.

You're good to go!
